Hints for some of the points:

- 1 - edge of open heather, this one isn't the easiest
- 2 - next to an observation seat in tree
- 3 - large fallen tree
- 4 - on the border of forest and heather, slight rise
- 5 - not exactly where marked on the map. It is much closer to the bike trail than marked, if you are looking closely for it from the trail you will see it.
- 7 - note the crosses on the map, indicating manmade structures
- 8 - use the contour lines. Also an interesting twisted tree.
- 9 - use the contour lines.
